84 Patients screened

Study Cohort (n=62)

65 Fractures

Unilateral Fractures (n=59)

Statistical Analysis (n=59)
- Range of Motion
- Leg Length
- Neck-Shaft-Angle
- Osteoarthritis Score for comparison with uninjured limb

Bilateral Fractures (n=3, 6 fractures)

Patients excluded (n=22)
- 15 died before 1-year follow-up
- 7 were bedridden/moribund

Statistical Analysis (62 patients, 65 fractures)
- Harris Hip Score
- Short Form-36
- Visual Analogue Scale
- Body Mass Index
- Osteoarthritis Score
