1. Modules

A. Matrix
   - Biscuit
   - Feed
   - CRM 1%

B. DNA extraction
   - CTAB
   - Wizard
   - Dellaporta

C. DNA concentration
   - Spectrophotometer/
     Fluorometer

2. DNA quality

Inhibition run

3. GM quantification

CRL-CMFF validated event-specific method for detection of 40.3-2 soybean

4. Data analysis

Assessment of the effects of matrix and extraction method, and their interactions
