Selection of CD22⁺ cells from a pool of blood from 5 donors

Stimulation with CpG2006 and IL-2 (4 days)

Cell washing and selection of IgG⁺ cells

**SEQUENTIAL**
(8 x 10⁵ cells)

- EBV infection (15 hours)
- Cell washing and 10 day culture on allogeneic PBMCs

**COMBINED**
(8 x 10⁵ cells)

- EBV infection combined with stimulation (CpG2006 and IL-2)
- 10 day culture on allogeneic PBMCs

**BASIC**
(8 x 10⁵ cells)

- EBV infection (15 hours)
- Cell washing and 10 day culture on allogeneic PBMCs

Evaluation of cell viability, morphology and expression of CD23
