A graph showing CDP Amplitude over time. The graph displays peaks labeled N1, N2, and N3, indicating different stages of the response. The time axis is labeled in milliseconds, ranging from -700 ms to 0 ms, with specific points labeled for -600, -500, -400, -300, -200, -100, and 0 ms. The amplitude is measured in units from -700 to 0, with specific points marked at -600, -500, -400, -300, -200, -100, and 0. The stimulus artifact is indicated at the beginning of the graph.
