Hydrophobic cluster species length

Secondary structure preference of hydrophobic cluster species (frequencies of association)

- Coil (C)
- Strand (E)
- Helix (H)
- No preference (H, E, C) or multiple (M)

Hydrophobic cluster species length

Secondary structure preferences of hydrophobic cluster species (propensities)

- Coil (C)
- Strand (E)
- Helix (H)
- No preference (H, E, C) or multiple (M)

Pie charts showing the distribution of secondary structure preferences for hydrophobic cluster species.
