Percentage of acromegaly patients with tumor shrinkage >10% for different therapies:

- **All somatostatin analogues (n=921)**
- Octreotide sc (n=478)
- Lanreotide SR (n=263)
- Octreotide LAR (n=180)

The diagram shows the percentage of patients with tumor shrinkage >10% for each therapy type, comparing first-line therapy, adjuvant therapy, and the total population.
