N=826 patients approached (Sent appointment letter)
N=594 respondents (Attended appointment)
N=369 randomized

Baseline
All groups = S&P
6-month Group
Allocated to intervention N=125
Received allocated intervention N=125

6-month Group
Did not receive allocated intervention N=116
Did not attend N=7
Patient chose to discontinue N=2
Withdrawn by family dentist N=0
Withdrawn by independent examiner N=1
Recruited in error N=3

12-month Group
Allocated to intervention N=122
Received allocated intervention N=122

12-month Group
Did not receive allocated intervention N=111
Did not attend N=1
Patient chose to discontinue N=2
Withdrawn by family dentist N=0
Withdrawn by independent examiner N=5
Recruited in error N=3

24-month Group
Allocated to intervention N=122
Received allocated intervention N=122

24-month Group
Did not receive allocated intervention N=110
Did not attend N=6
Patient chose to discontinue N=5
Withdrawn by family dentist N=1

N=826 patients approached (Sent appointment letter)
N=594 respondents (Attended appointment)
N=369 randomized

12-month Group
Allocated to intervention N=122
Received allocated intervention N=122

12-month Group
Received allocated intervention N=112
Did not receive allocated intervention N=0
Did not attend N=7
Patient chose to discontinue N=2
Withdrawn by family dentist N=0

24-month Group
Allocated to intervention N=122
Received allocated intervention N=122

24-month Group
Received allocated intervention N=103
Did not receive allocated intervention N=0
Did not attend N=10
Patient chose to discontinue N=6
Withdrawn by family dentist N=1

N=826 patients approached (Sent appointment letter)
N=594 respondents (Attended appointment)
N=369 randomized

18-month Group
Allocated to intervention N=125
Received allocated intervention N=125

18-month Group
Received allocated intervention N=110
Did not receive allocated intervention N=0
Did not attend N=7
Patient chose to discontinue N=4
Withdrawn by family dentist N=1
Withdrawn by independent examiner N=3

24-month Group
Allocated to intervention N=125
Received allocated intervention N=125

24-month Group
Received allocated intervention N=108
Did not receive allocated intervention N=0
Did not attend N=7
Patient chose to discontinue N=4
Withdrawn by family dentist N=1
Withdrawn by independent examiner N=3

N=826 patients approached (Sent appointment letter)
N=594 respondents (Attended appointment)
N=369 randomized

Analysis
Included in analysis N=106 or 107
Excluded from analysis N=18 or 17
Reasons for exclusion = missing data

Included in analysis N=100 or 101
Excluded from analysis N=22 or 21
Reasons for exclusion = missing data

Included in analysis N=99 or 100
Excluded from analysis N=23 or 22
