CROSS-SECTIONAL POPULATION-BASED STUDY

SAMPLE CALCULATION

Schools: n = 83
Population: 4000 students aged 12 years
Sample of 1389 students

Public Schools
n = 43

- Participating schools n = 42
- Non-participating schools n = 1

- Participating students n = 787

Private Schools
n = 40

- Participating schools n = 23
- Non-participating schools n = 17

- Participating students n = 658

Total students investigated n = 1445

Total students used in analysis n = 1118
