Potentially-relevant articles screened (n=1,237)

Articles identified by at least one reviewer for further review (n=78)

Potentially-appropriate articles (n=76)

Included articles (n=28)

Survey only (n=10)

Survey + DA (n=10)

DA only (n=7)

DA available (n=6)

Distinct DAs (n=2)

Not sufficiently described for extraction (n=1)

Duplicate DAs (n=4)

Total surveys (n=20)

Total DAs (n=19)

Records excluded (n=1,159)

DAs identified by online search (n=8)

DAs included by consensus with second reviewer (n=8)

Record unavailable (n=2)

Records excluded (n=48)

Reasons for exclusion:
- Not a method of patient engagement
- Not used in context of actual decision
- Contraception decision making for males
- Not sufficiently described for extraction (n=1)
- Duplicate DAs (n=4)
