Figure 5 Percent effect of VBME (100, 200 and 300mg/kg) and Tramadol$^R$ (30mg/kg) on tail immersion pain in mice. Each point represents the mean ± SEM of 6 animals. The data was analyzed by ANOVA followed by Dunnett’s test. Asterisks indicated statistically significant values from control. *$P < 0.05$, **$P < 0.01$, ***$P < 0.001$
