The graph shows the levels of TGF-beta and TNF-alpha (pg/ml) in various groups of rats.

- Normal Rats
- Cirrhosis Rats
- Silymarin-treated Rats
- Low Dose CLRE-treated Rats (250 mg/kg)
- High Dose CLRE-treated Rats (500 mg/kg)

- TGF-beta
- TNF-alpha

Significance levels indicated by stars: *

** Significant difference compared to Normal Rats
