**Diagram 1:**

**Codeine serum concentration [pmol/ml⁻¹] vs. time [h]**

- The concentration of codeine decreases over time, showing a typical exponential decline.
- The data points are accompanied by error bars indicating variability.

**Diagram 2:**

**C-6-G serum concentration [pmol/ml⁻¹] vs. time [h]**

- The concentration of C-6-G also decreases over time, following a similar pattern to codeine.
- Similar error bars for C-6-G concentration are present.
