Figure 1a: "It is part of my job as an internist to advocate for populations' health needs within society"

Figure 1b: "I feel that my role as a health advocate extends beyond the individual patients I am treating"

Figure 1c: "I am able to identify the health needs of an individual patient during patient care (beyond biomedical needs)"

Figure 1d: "I can identify the determinants of health (psychological, biological, social, cultural and economic aspects) of patients in my community"
