• Sampling of 523 medical students in 20 groups (clusters)

• Cross-cultural adaptation of GRAS to GRAS-DK in five steps as illustrated in figure 1

• Addition of background variables to the questionnaire
• Addition of an open-ended comments box to the questionnaire

• Data collection, including a visit to all groups and one reminder to non-responders

• Re-test

• Statistical analyses (descriptive, CFA, and EFA)
