The diagram compares the teaching structure, interpersonal communication, and total evaluation score between trained and untrained teachers. The box plots show the distribution of scores with the median values indicated. For teaching structure, the median for trained teachers is 76.7% compared to 83.3% for untrained teachers, with a p-value of 0.12. For interpersonal communication, the median for trained teachers is 71.8% compared to 79.5% for untrained teachers, with a p-value of 0.08. For total evaluation score, the median for trained teachers is 68.0% compared to 72.0% for untrained teachers, with a p-value of 0.04.
