Telephone recruitment interview  
\(n = 1,000\)

- Refuse to be interviewed  
  \((40\%, n = 200)\)

- Ineligible  
  \((50\%, n = 500)\)

- Decline participation  
  \((20\%, n = 60)\)

Baseline concordance assessment \((n = 240 \text{ dyads})\)  
2 in-person interviews

Stratified randomization

- Intervention group  
  \((n = 120 \text{ dyads})\)  
  - Month 1: First home visit  
  - Month 2: AD information session  
  - Month 3: Second home visit

- Lost to follow-up  
  \((10\%, n = 12 \text{ dyads per group})\)

- Control group  
  \((n = 120 \text{ dyads})\)  
  - Month 1: First workshop  
  - Month 2: Second workshop  
  - Month 3: Third workshop

First posttest (at the end of the intervention)  
\((n = 108 \text{ dyads per group})\)

- Lost to follow-up  
  \((20\%, n = 22 \text{ dyads per group})\)

Second posttest (6 months post-intervention)  
\((n = 86 \text{ dyads per group})\)
