Scenario 1

**A**
- OP only

**B**
- OP + CTH for 1 year

- **Local recurrence**
- **Distant metastasis**

**Survival benefit in B:** 5%

**Side effects**
- Nausea + vomiting
- Diarrhea
- Mucositis of oral mucosa
- Hair loss

**Total**

---

**Notes:**
- The diagram illustrates the comparison between OP only and OP + CTH for 1 year in terms of local recurrence, distant metastasis, and side effects. The visual representation shows a higher prevalence of side effects in OP + CTH compared to OP only, with a notable survival benefit in the latter.
