Which key parameters are missed and how often?
Figure 6.

The bar chart shows which key parameters are missed and how often. The x-axis represents various parameters including weight, BP, ACEI, statin, Hba1c, serum Cr, LDL, UACR, Eye Exam, Foot Exam, Severe hypoglycemia, Non-severe hypoglycemia, Recent CV event, Perfusion of foot, Light touch sensation in foot, and Integrity of skin on foot. The y-axis represents the number of records missing each item, with lower being better.

Legend:
- COAS
- Recent dictated note and attached labs
- Old dictated note (>1y) and attached labs
