The graph shows the Rating of Perceived Exertion (RPE) on Borg's Scale for different CPR conditions and durations. The conditions include Audio, Visual, and No Feedback. The duration options are 5 minutes and 10 minutes. The RPE scale ranges from 6 (No exertion) to 20 (Maximal exertion). The graph indicates that the RPE is higher for the No Feedback condition compared to Audio and Visual conditions, especially for the 10-minute duration.
