**Policy domain**

**Policy problem:**
Lack of transparent information about the performance of health care providers

**Information needs of:**
Consumers
Health insurers
Professionals
Managers
Patient organisations
Inspectorate for health
Policy makers

**Interaction between researchers and stakeholders**

**Transformation:**
Determine scope and purpose of indicator development

**Operationalisation:**
Input of stakeholders in operationalisation and instrument construction

**Presentation:**
Input of stakeholders in determining reporting formats

**Research domain**

**Research question:**
How to measure the performance of health care providers in a valid and reliable manner?

**Method:**
Operationalise performance; construct and test measuring instruments

**Analyses and results:**
Analysis of data about the performance of health care providers

**Reports:**
Construction of reports aimed at consumers, health insurers, professionals and other stakeholders
