How methodologies complement each other?

Exhaustive review of the NGO annual reports of activities.
Base information about the activities (primary, secondary and tertiary prevention) done by Aids-NGO.

Phase of indicators consensus meetings
To discuss with the professionals and achieve a consensus about the proposal of indicators. To discuss whether the indicators will be useful to evaluate the activities in the daily work flow.

Qualitative study
To explore how, when, where and why are done the activities in order to formulate the indicators. We discovered other activities do not registered in the annual reports or in the transversal study.

Transversal descriptive study
To complement activities and establish relationships between objectives and activities.

Phase of indicators consensus meetings
To discuss with the professionals and achieve a consensus about the proposal of indicators. To discuss whether the indicators will be useful to evaluate the activities in the daily work flow.
