Step 1: Resource Use stratified by ASGC region and patient treatment setting

Step 2: Resource Use Costed by ASGC region and patient treatment setting

Step 3: Cost weighted by proportion of total visits in each patient treatment setting within each ASGC region

Step 4: Reduction (%) in patient visits by ASGC region applied to Settings 2 (One Staff Visits) and 3 (More Than One Staff Visits) to patient visits outside the clinic

Step 5: Total costs in each treatment setting (from Steps 3 and 4) combined (summed) & weighted by National Risperidone LAI unit sales/ASGC region

National average saving per 2-weekly injection of Risperidone LAI avoided: $75.14 (95% CI: $64.06, $97.75)
