Patient Survey
If you fill in this questionnaire, you are agreeing that the researchers can ask the nurse or doctor you are seeing today for some information about the reason you are attending. The researchers will not know who you are, but will get information about what tests you had, your diagnosis (e.g. ‘warts’ or ‘Chlamydia’), and treatment and action taken. They will also tell us your date of birth and gender. The clinic will not give us your name or address, we will match the information using a number instead. The GP surgery staff will not see what you write on this questionnaire.

We are not asking you to sign your name to show you agree, because we don’t need to know what your name is. But we do want to be sure that you understand that we will ask the GP surgery for this information.
