In 2001, the original database contained information on institutions for disabilities and long-term care facilities, with "hospitals with 100 or more beds for acute care" included in the database. The database contained 3268 institutions.

From this database, 1568 institutions returned the questionnaire, resulting in 1406 hospitals with fewer than 10 beds for acute care and 1357 institutions for disabilities and long-term care facilities (41.5%).

In 2010, 2600 institutions were included in the database, with 940 hospitals with fewer than 100 beds for acute care and 913 institutions for disabilities and long-term care facilities (351%).
