Phase I: Constructing the items

Participants: Expert group N=11

Constructing the items & face validity Items=46

Phase II: Pilot test

Participants: Expert group N=8

Content validity

Participants: Health care providers N=20

Phase III: Pilot test

Consistency test Items=43

Participants: Health care providers N=295

Phase IV: Assessment of the stability

Stability test (test-retest) Items=43

Participants: Health care providers N=68

Validity test Items=33 (Six factors)

Principle factor analysis Items=26

Phase V: Final test

Participants: Health care providers N=841

Reliability test Items=26 (Six factors)

Internal consistency Test

Stability test (Split-half)
