Dear Study Participant

These questionnaires ask about your health. Please select the answer that best describes how you feel. There are no right or wrong answers. No matter what answers you record, you are guaranteed the same treatment. You may leave an answer blank if you object to the question. If you have any questions or concerns, you may direct them to the research staff.

The information you provide will be kept confidential. Only the investigators will have access to the information collected in this study. Any report or presentation of this study will not identify you by name.

Thank you for your time

To help people say how good or bad their state of health is, we have drawn a scale (rather like a thermometer) on which the best state you can imagine is marked 100 and the worst state you can imagine is marked 0.

We would like you to indicate on this scale how good or bad your own health is today, in your opinion. Please do this by drawing a line from the box below to whichever point on the scale indicates how good or bad your state of health is today.

Dear Colleague,

The above-named patient is wait-listed for Bariatric Care and has been enrolled in the CIHR-funded EVOLUTION Trial. This 9-month randomized controlled trial is being performed in partnership with Alberta Health Services and will compare three different educational interventions designed to improve patients’ success once in bariatric care. Patients will receive three months of education and then be followed within the bariatric clinic for six months. Outcomes include body weight, quality of life and costs.

Patients will have bloodwork at baseline and 9 months (fasting lipids, creatinine, A1c). Please note that to avoid unnecessary duplication of testing, this bloodwork will be available on NetCare.

Best Regards,

Raj Padwal, MD, FRCP(C)
Principal Investigator
EVOLUTION Trial
