**Workshop 1: Future health**

1. Advertised widely in community.
2. Interviewed hard to reach members of community.
3. Point is to establish local context and introduce thinking about health.

**Discussed:**
1. What are participants’ aspirations for the community’s future?
2. What is the role of health in that?
3. What are key health issues ‘round here’?

**Workshop 2: Health evidence**

1. Advertised widely in community.
2. Interviewed hard to reach community members.

**Discussed:**
1. How do your perceptions of local health compare with data that managers are using?
2. Given this information, what are your priorities for health in this community?

**Workshop 3: Service road show**

1. Advertised widely in community.
2. Used priorities from workshop 3 to identify services and initiatives to present to community.

**Discussed:**
1. Latest ways to address community priority areas.
2. Innovative models implemented by other rural communities.

**Workshop 4: Planning exercise**

1. Advertised widely in community.
2. Built on previous information.
4. Structured process worked from priorities to a plan.

**Discussed:**
1. Community health priorities
2. Competencies needed local to address these

**Key principles**
3. Workforce & infrastructure model that fit within budget
4. Multi stakeholder planning simulation
