This diagram illustrates the relationships between various health-related departments and organizations. The Department of Health oversees the provision of health care, education, and research. The Department for Business, Innovation & Skills is involved in higher education and research funding. Universities and Medical Schools play a role in undergraduate and postgraduate medical education and training. The National Institute for Health Research and the Health Education England are key players in health research and education. Local Education & Training Boards, Regional & Local Area Teams, and Clinical Commissioning Groups are responsible for the delivery of patient care. The Monitor (economic regulator) & Care Quality Commission ensure the quality and efficiency of health services.
