Screened 10-12 admitted patient per week meeting study inclusion during 2008 to 2011

Randomized 945 patients to one of 3 groups

- **Enhanced**
  - n = 314
  - 311 received intervention
  - 3 found ineligible early in the study
  - 12 deceased
  - 8 lost to follow-up
  - 4 withdrew
  - 287 completed the study
  - n = 311 for primary analysis
  - n = 307 for 30 day MAI data analysis

- **Minimal**
  - n = 315
  - 312 received intervention
  - 2 found ineligible early in the study
  - 1 did not have baseline evaluator data
  - 5 deceased
  - 8 lost to follow-up
  - 2 withdrew
  - 296 completed the study
  - n = 312 for primary analysis
  - n = 304 for 30 day MAI data analysis

- **Usual Care**
  - n = 316
  - 313 received intervention
  - 1 found ineligible early in the study
  - 2 did not have baseline evaluator data
  - 7 deceased
  - 5 lost to follow-up
  - 1 withdrew
  - 300 completed the study
  - n = 313 for primary analysis
  - n = 309 for 30 day MAI data analysis
