Peer groups in the southern part of Norway (n\textasciitilde250) will be invited to participate

Approximately 1/3 of the peer groups recruited to the trial

**Randomization**

Half of recruited peer groups:
**Intervention:** *Antibiotics for upper respiratory tract infections*
Control: Prescription patterns in elderly \(\geq 70\) years

Anticipated loss, due to drop outs and withdrawals, estimated to 10%

Remaining peer groups in the tailored intervention

Retrospective 12 months data collection from EPR* and NorPD**

Intervention in peer groups including 2 visits by Rx-PADs***, discussions within the peer groups, work-shop, audit and feedback reports

Retrospective 12 months data collection from EPR* and NorPD**

Analysis of data and preparation of manuscripts. Feedback to participating peer-groups
