Hospital financial data from ICU costing study (Data set A)

Survey financial data from CESAR hospitals not in ICU costing study

Statistical analyses of ICU expenditure and patient throughput

Cost/ day of ICU for all hospitals in trial

Merge with dataset A

Repeat statistical analyses of (A)

ICU/HDU patient level activity and characteristic raw data (Data set B)

Statistical analyses of data set (B)

Weights for no of organs supported / day

Cost/ day unit stay x weights for no of organs supported = adjusted cost/ day in ECMO unit

Survey activity and unit characteristic data from ECMO hospital (data set C)

Statistical analyses of data set (C)

Cost/ day in unit

Inputs to CESAR analysis

Cost/ day of ICU stay x weights for no of organs supported = adjusted cost/ day for all hospitals in trial
