A

**Figure A**

Histograms of flow cytometry data for different cell lines: RWPE-1, LNCaP, PC3, and DU145. The histograms show the distribution of cells in different phases of the cell cycle, specifically sub-G0, G0/G1, S, and G2/M phases. The data is represented for two conditions: pEGFP and pDICE1-EGFP.

B

**Figure B**

Bar graphs showing the percentage of cells in each phase of the cell cycle for RWPE-1, LNCaP, PC3, and DU145. The bars are compared between pEGFP and pDICE1-EGFP conditions. Statistical significance is indicated by asterisks.
