2918 samples collected

276 samples *P. malariae* positive by diagnostic PCR

1763 samples *P. falciparum* positive by diagnostic PCR

257 samples genotyped for at least one of six *P. malariae* microsatellite loci

257 samples matched to *P. malariae* samples by age, gender and village of residence

257 samples genotyped for at least one of eleven *P. falciparum* microsatellite loci

Six of eleven *P. falciparum* microsatellite loci selected for population analysis

164 samples genotyped for all six *P. malariae* microsatellite loci

200 samples genotyped for all six selected *P. falciparum* microsatellite loci

130 sample pairs genotyped for all six *P. malariae* and *P. falciparum* microsatellite loci
