Figure 1

Total number of patients included in RCTs n=8,179

- AE analysis
  - N=8,179 patients
  - 8,542 AE
    - ASAQ N=3,113 patients, 3,634 AE
    - Comparator N=3,066 patients, 4,908 AE

- TEAE analysis
  - N=3,334 patients
  - 6,294 AE
    - ASAQ N=1,281 patients, 2,426 AE
    - Comparator N=2,053 patients, 3,868 AE

  - 3,943 TEAE
    - ASAQ N=1,281 patients, 1,493 TEAE
    - Comparator N=2,053 patients, 2,450 TEAE

AE = any event (sign/symptom) occurring after first drug intake (irrespective of whether present at enrolment or not) Irrespective of causality

TEAE = event (sign/symptom) occurring after first drug intake that was not present or was less intense at enrolment Irrespective of causality
