Figure 3

Study design overview

Pre-intervention

- Intervention villages (n = 40 villages)
- Control villages (n = 60 villages)

Time

- IPC Intervention (18 months)
- Other sources of information

Post-intervention

- Baseline survey
  - Intervention and control domains (n = 487 households / 300 children each)

- Follow-up survey
  - Intervention and control domains (n = 487 households / 300 children each)
