Emerging opportunities to eliminate fake antimalarials/malaria

- Community-based anti-counterfeit campaigns
- Determine the actual extend and nature of the problem
- Strict law enforcement agency against all the perpetrators
- Setting up quality drug surveillance systems,
- Developing affordable next generation antimalarials
- Removal of taxes and tariffs on antimalarials and other commodities of malaria control
- Sharing the knowledge and logistical information within and between the endemic countries,
- Launching and maintaining the regional, national and international databases
