Overall study case fatality ratio of severe malaria in a mesoendemic area

- Adjusted odds ratios of death from severe malaria for low, moderate and high transmission areas and for cerebral malaria

Case fatality ratio of severe malaria in hypo-, meso- and hyperendemic areas of Sudan

- Adjusted odds ratio of death from severe malaria by age group

Age specific case fatality ratio of severe malaria for each area

Average age specific case fatality ratio weighted by estimated number of severe malaria episodes in each area

- Mid-year population in each age group
- Number of deaths in each age group in 2002
- Number of incident malaria episodes in each age group
- Average duration of malaria

Age specific mortality rates of malaria
