Figure 1: Proportion of children with false-positive Immunoquick® Malaria or Optimal® IT during follow-up, stratified by day-0 parasite density. (P/H: parasite density: ▲ 50,000 – 525,000 p/µL; ■ 10,000 – 50,000 p/µL; ♦ 1,000 – 10,000 p/µL. P/L: parasite density: △ 50,000 – 525,000 p/µL; □ 10,000 – 50,000 p/µL; ◇ 1,000 – 10,000 p/µL.)
