408 children enrolled and followed-up in Kanungu

GEL

- 11 non-falciparum
- 37 new infections
- 90 recurrent parasitemia subjects genotyped with MSP2
  - 42 subjects genotyped with GLURP
    - 30 subjects genotyped with MSP1
      - 16 recrudescent outcomes
      - 8 unsuccessful samples for all markers
    - 22 subjects genotyped with MSP1
      - 15 recrudescent outcomes
      - 5 unsuccessful samples for all markers
  - 209 subjects genotyped with MSP2

CE

- 11 non-falciparum
- 93 new infections
- 90 recurrent parasitemia subjects genotyped with MSP2
  - 40 subjects genotyped with GLURP
    - 109 subjects genotyped with MSP1
      - 20 subjects genotyped with MSP1
        - 42 recrudescent outcomes
        - 7 unsuccessful samples for all markers
      - 69 subjects genotyped with MSP1
        - 20 new infections
        - 40 new infections
        - 2 new infections
  - 209 subjects genotyped with MSP2

417 children enrolled and followed-up in Apac

GEL

- 7 non-falciparum
- 125 new infections
- 209 recurrent parasitemia subjects genotyped with MSP2
  - 77 subjects genotyped with GLURP
    - 109 subjects genotyped with MSP1
      - 37 subjects genotyped with MSP1
        - 42 recrudescent outcomes
        - 6 unsuccessful samples for all markers
      - 69 subjects genotyped with MSP1
        - 20 new infections
        - 40 new infections
        - 9 new infections
