Figure 1. Daily Energy Intake of US Adults by Income Group and Food Source, 1965-2007

* Percentage of calories eaten from home sources differed significantly from HFCS 1965-1966, \( p \leq 0.01 \) (t-test)

** Percentage of calories eaten from home sources differed significantly from previous survey, \( p \leq 0.01 \) (t-test)

*** Percentage of calories eaten from home sources differed significantly between low and high income groups for relevant survey year, \( p \leq 0.01 \) (t-test)
