**STEP 1: Identification**

Results obtained from MEDLINE, EMBASE and CINAHL:

- **N = 860**

**Studies excluded from review**

- **N = 243** Duplicates

**STEP 2: Screening titles**

Results screened for eligibility:

- **N = 617**

Agreed to include:

- **N = 164**

Disagreement:

- **N = 99**

Title did not include SES and/or health inequalities + social capital

**STEP 3: Screening abstracts**

Abstracts screened

- **N = 264**

Agreed to include:

- **N = 50**

Disagreement:

- **N = 73**

No analysis of socio-economic inequalities in health in relation to social capital

N = 36

Full-texts reviewed:

- **N = 86**

N = 37

Focus on ethnic or gender inequalities

Grey literature

Reviews/ background papers

No full-text available

**Total included in analysis:**

- **N = 60**
