Figure A shows the relative CSF-1 mRNA level in SKOV3 cells transfected with miR-128OE, miR-152OE, and pCMV-Mir compared to control.

Figure B illustrates the relative CSF-1 mRNA level in SKOV3 cells transfected with miR-128Inh, miR-152Inh, and InhCTRL compared to control.

Figure C presents Western blot analysis of CSF-1 and Actin in SKOV3 cells transfected with miR-128OE, miR-152OE, miR-128Inh, miR-152Inh, and InhCTRL.

Figure D and E display the relative CSF-1 mRNA level in SKOV3 cells transfected with miR-128OE, miR-152OE, and pCMV-Mir, and miR-128Inh, miR-152Inh, and InhCTRL, respectively.

Figure F includes Western blot analysis of CSF-1 and Actin in SKOV3 cells transfected with miR-128OE, miR-152OE, miR-128Inh, miR-152Inh, and InhCTRL.
