**Figure A**

Western blots showing expression of eIF4A, MGMT, and 4E-BP1 over time (0, 24, 48, 72 hours).

**Figure B**

Graph showing % change relative to eIF4A control over time (0, 24, 48, 72 hours).

**Figure C**

Bar graph comparing % of $^{35}$S methionine incorporation relative to control between Untreated and TMZ treated samples at 24 and 72 hours. **asterisk** indicates a significant difference.
