A. Western blots for G9a, GLP, and GAPDH proteins.

B. Graphs showing proliferation of FaDu and SAS cells with different BIX concentrations (0, 2.5, 5 µM).

C. Colony formation assays for FaDu and SAS cells with shLuc, shG9a-1, and shG9a-2.

D. Number of colonies formed by FaDu and SAS cells with different BIX concentrations.

E. Images of colonies formed by FaDu and SAS cells with different shRNA treatments.

F. Bar graphs showing number of colonies formed by FaDu and SAS cells with different BIX concentrations.
