**Figure A**

Caspase 8, Caspase 9, and Caspase 3 were detected in extracts from cells treated with different conditions: Ctrl., SW43, and SW IV-134. The images show the presence of both precursor and cleaved forms for each caspase.

**Figure B**

Viability of SKOV3 cells treated with SW IV-134 in the presence or absence of Z-VAD. The graph illustrates the percentage viability on the y-axis and SW IV-134 concentration in μM on the x-axis.

- **Ctrl.**: Closed circles
- **Z-VAD**: Open squares
