A. Western blotting analysis of p21, p27, cyclin D1, α-tubulin, and pRb proteins under U0126 treatment over time (30', 1h, 3h, 6h, 12h, 1d, 2d, 4d).

B. Graph showing fold increase in p21 and p27 expression levels (Treated/Untreated cells) over time.

C. Western blotting analysis of p21, cyclin D1, and GAPDH proteins under U0126 treatment over time (8 hrs, 3d, 4d).
