### Graphical Representation

The graph illustrates the cumulative survival rates of different groups over time.

- **Wt Δp53 - Wt p53**
  - Shows a lower cumulative survival rate compared to the other groups.
  - Significance level: *p* < 0.05

- **M Δp53 - M p53**
  - Indicates a moderate cumulative survival rate.

- **Wt Δp53 - M p53**
  - Demonstrates a higher cumulative survival rate than the other groups.

The x-axis represents the months, and the y-axis represents cumulative survival.
