Figure A: Tumor volume (mm$^3$) over weeks with different treatments.

Figure B: Tumor weight (mg) comparison between different groups.

Figure C: Western blot analysis showing the expression of p53, Bax, and β-Actin.

Figure D: RT-qPCR analysis showing the expression of p53, β-actin, p21, and bax.

Figure E: Immunoprecipitation (IP) analysis showing the binding of p53 with p21.
