Figure 3

A: Graph showing tumor volume (cm³) over time (weeks) with indicated n = 10, P = ns.

B: Graph showing MPE volume (μl) with indicated n = 11, P = .0001, n = 16, P = ns, n = 13.

C: Images showing control, bortezomib prevention trial, and bortezomib regression trial.

D: Bar graph showing fraction surviving time post-LLC cells (days) with indicated n = 31; 16(14-18), n = 27; 22(19-25), n = 29; 21(20-22), P = ns.

E: Line graph showing fraction surviving time post-LLC cells (days) with indicated n = 87, P = .0002.
