The image contains a line graph showing the distribution of various biomarkers across different percentile ranges. The biomarkers include Total Cholesterol (TC), Triglycerides (TG), High-Density Lipoprotein Cholesterol (HDL-C), Low-Density Lipoprotein Cholesterol (LDL-C), and Glucose (GLu).

- **TC** is represented by a blue diamond line, with values indicated at the percentiles: 4.10 (85th percentile), 5.04 (95th percentile).
- **TG** is represented by a red triangle line, with values indicated at the percentiles: 0.80 (85th percentile), 0.82 (95th percentile).
- **HDL-C** is represented by a green triangle line, with values indicated at the percentiles: 1.52 (85th percentile), 1.40 (95th percentile).
- **LDL-C** is represented by a purple triangle line, with values indicated at the percentiles: 2.20 (85th percentile), 2.43 (95th percentile).
- **GLu** is represented by a blue square line, with values indicated at the percentiles: 4.9* (85th percentile), 4.93 (95th percentile).

The graph indicates the concentration levels in mmol/L for each biomarker across different percentile ranges: <85th percentile (n=156), 85th-94th percentile (n=81), ≥95th percentile (n=104).
